GENESIS OF KNOWLEDGE

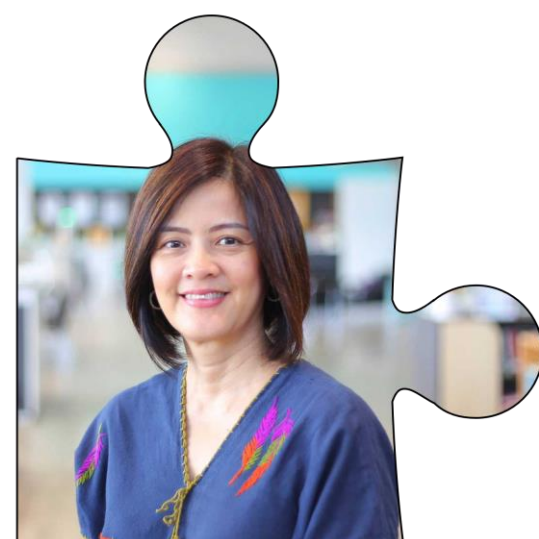

Special Edition: behind all the jigsaws

This special issue will bring you the perspective of the special piece of jigsaw that supervised the works which are not the splendid facet of ISSF 2020 but lies behind those beautiful scenes

I am the Chairperson of the committee that oversees the on-line registration, arrival & departure of guests, on-site registration, editing & proofreading, buddy, souvenirs, and teachers' lounge. It is a huge committee, but I have very capable teams comprising teachers and staff. I have taken two units under my wing, namely the on-line registration and the buddy team as they are closely related.

For the on-line registration, we have been working very hard since September 2019. I believe this committee is like a locomotive, very much a crucial piece of a puzzle. This committee holds the Masterfile that contains all information of our 183 local and international guests. We are the first committee to start work as we had to get the on-line registration going. Once that was in order, there were many correspondences to entertain as we had to check our participants' details to ensure absolute accuracy that means there must be no room for errors basically as all other organizing units will depend on this file to proceed with their respective work, whether on t-shirts sizes, accommodation, dietary requirements, poster and presentation categories, etc. Any piece of an update, whether last-minute changes or change of participants, this committee has to relay that information to all others

The other huge sub-committee is the buddy team, where the keyword is all about hospitality. And, I guess that explains a total of 90 people comprising students and teachers on this team. This are renowned for their warmth and care for their guests, and we want our guests to be comfortable when they are away from home, and to bring back these wonderful memories. Our team reached out to our local and international buddies even before they left their respective schools or countries, so at least when they arrive, they can put faces to the names that they have already known via the emails. And, we hope the new-found friendship continues to be an everlasting one.

Dr. Jane Kanjanaphoomin, English teacher

“... hope the new-found friendship continues to be an everlasting one.”
